SKILLS

Expert

- React
- Angular
- TaiwlindCSS
- PrimeNG
- TypeScript
- RxJS
- Redux

Beginner

- MySQL
- GIT
- CI/CD
- Spring Boot
- JEST
- Express

SOFTWARE

- Intellij
- GitHub, GitLab
- Claude, Cursor
- Vite
- Npm
- Node
- Docker

ABOUT ME

Developer with 3 years of experience, including 2 years of commercial experience. I specialize in **React and Angular**, delivering projects end to end, from implementing UI designs to production deployment, with a strong focus on **performance, security, and code quality**. I also have **backend experience**, including working with REST API's and building and integrating server-side endpoints.

As a **finalist of Europe's largest hackathon (HackYeah 2024)**, I co-created the CountryBike project, combining technical skills with creativity and effective teamwork.

EXPERIENCE

BBCR sp. z o.o. | Front-end Developer **11/2023 - now**

- Delivered custom web applications for clients using React and Angular, covering frontend design and development from **requirements analysis** to **production deployment**.
- Had a direct impact on UI mockups and functional assumptions in **collaboration with a designer**, improving usability and interface consistency.
- Built full Progressive Web Applications (**PWA**) with a focus on **performance** and **responsiveness**.
- Established a consistent approach to building administrative panels in Angular (PrimeNG) by creating a set of custom reusable components and patterns, **reducing development time** for future projects.
- Delivered an EU-funded project, adapting the application to quality and documentation requirements in compliance with **WCAG** standards.
- Implemented **security mechanisms** such as JWT authentication and form validation, increasing application resistance to unauthorized access.
- Configured CI/CD pipelines using GitHub Actions and GitLab CI, **improving team workflow** and **shortening deployment time**.
- Contributed to **REST API design** and participated in **backend development**, improving cross-team collaboration and feature delivery speed.
- Maintained a **Vue.js**-based application, including code refactoring and performance optimization, **improving product stability**.

Freelancer **02/2026 - now**

Flutter | Spring Boot

- Co-developed an application for the dietary industry, addressing real user needs in the area of diet management.
- Had a **direct impact on the product's visual design**, actively working in Figma and co-deciding on the visual direction of the application.

- Linux
- Postman
- MySQL Workbench

ARTICLES

What my engineering thesis taught me?

LANGUAGES

- Polish - native
- English - B2

- **Developed the mobile layer in Flutter** based on Clean Architecture (MVVM), ensuring scalability and ease of further development.
- **Built a performance benchmarking system for business algorithms**, enabling data-driven decisions regarding the product's development direction.

EDUCATION

Lublin University of Technology 09/2022 - 03/2026
Computer Science | Engineer's degree

Engineering Thesis: *A web application for creating business process automation in a no-code model.*

Team project (2 people) focused on understanding the architecture and operating mechanisms of **no-code** automation platforms and building a proprietary **SaaS**-class solution.

Lublin University of Technology from 09/2026
Computer Science | Master's degree
